Customer Expedite Quote and Book Instructions and JSON Examples

August 2024

Contents

Instructions	3
Example Quote	5
Book and get status	10
Tracking Search	12
BOL	23
Expedite API Type Definition	24

Instructions

1. POST your ClientId and ClientSecret to /authorize
2. Use the AccessToken that is returned as the bearer token. The API uses standard bearer authentication which you may need to familiarize with and implement.
3. POST your quote to /quotes. Use the .json model, the .html schema, and the example in this document to map your quote object. You must POST with the “authorization” header with value “Bearer eyJhbGc...” See instructions below.
4. Show the QuoteResponse.Products.ExpediteOptions to the end user.
5. If they choose to book, your client must POST the UnifiedQuoteNo “P000*” and ResponseNo 0 to /quotes/booking-request/expedite. See instructions below.
6. The booking will be verified by an operator and booked in minutes. In the mean time, your client can check the booking status with a GET call to /quotes/booking-request/status?QuoteNo= P000* which will return
 - a. "Quoted"
 - b. "Booking"
 - c. "Booking in Progress"
 - d. "Shipment Booked"
 - e. "Unable to Fulfill"
 - f. or "Unknown".

If booked, the order number will be included in format yyyyymm12345 such as 20230470078.

7. After quotes/booking-request/status returns the pro number you can track with shipments/search. See example later in document.

We prefer that you begin integration against the test URI

`https://test.api.arcb.com/expedite/customer/`

Prior to a quote, you must get the basic authorization credentials by posting your client id and secret to <https://api.arcb.com/expedite/customer/authorize>. These are provided by ArcBest support.

```
{  
  "ClientId": "jgq934jg938jg945j455...", // 32 characters  
  "ClientSecret": "j5g4985jg9845j94j5g45..." // 64 characters  
}
```

This returns the ~1000 character access token.

```
{  
  "AccessToken": "j458gj4598gj9845gj9845jg984..."  
}
```

When quoting, pass the access token with the “Authorization” header and set the value to “Bearer < accesstoken>”

	Key	Value	Description

Response

Common Issues

By dates and ready dates refer to the time window the load will be “ready” and when it should be processed “by” so the ready datetime is before the by datetime.

It will need 2 character state/5 digit postcodes and the country uses 3 characters “USA”. If you’re doing international there are probably other considerations if we need to look into that.

See the value code lists at the end of the document.

Example Quote

```
{

}
```

Book and get status

POST your unified quote number to

<https://api.arcb.com/expedite/customer/quotes/booking-request/expedite>

```
{
  "UnifiedQuoteNo": "P0001997628",
  "ResponseNo": 0 // pass the responseno of the option returned from
the quote that you want to book.
}
```

Submitting a booking request will not immediately book the quote. Please check the booking request status to determine if the booking request was successful and retrieve your order number.

This is at GET /quotes/booking-request/status? QuoteNo= P0001997628

Response

```
{
  "Status": "Shipment Booked",
  "OrderNo": "20230470081" // pro 70081 from 04-2023 (April 2023)
}
```

GET /shipments/status-codes returns valid status code descriptions.

```
[
  {
    "Id": 0,
    "Name": "Assignment Pending"
  },
  {
    "Id": 1,
    "Name": "Error"
  },
  {
    "Id": 2,
    "Name": "In Transit"
  },
  {
    "Id": 3,
    "Name": "Dry Run"
  },
  {
    "Id": 4,
    "Name": "Scheduled For Pickup"
  },
]
```

```
{
  "Id": 5,
  "Name": "At Shipper"
},
{
  "Id": 6,
  "Name": "At Delivery"
},
{
  "Id": 7,
  "Name": "At Stopoff"
},
{
  "Id": 8,
  "Name": "Delivered"
}
]
```

Tracking Search

POST object below to /shipments/search with header Content-type application/json

Request

```
[
  "20230470078" // this value is returned from quotes/booking-request/status after our agent
  reviews and books it.
]
```

Response

```

BOL

Call [GET /shipments/bol/{expediteOrderNumber}](#) to get a .pdf of the BOL where expediteOrderNumber is yyyyymm13245 like 20240821345.

Expedite API Type Definition

Country Code: Please use three-digit country code in the origin and destination addresses:

USA

CAN

LocationType:

"BUSINESS"

"AIRCARGOFACILITY"

"CHURCH"

"CONSTRUCTION"

"CONVENTIONTRADESHOW"

"DISTRIBUTIONCENTER"

"FACTORYPLANT"

"MEDICALHOSPITAL"

"MEDICALOFFICES"

"MILITARYBASE"

"MINISTORAGE"

"OTHER"

"RESIDENTIALAPARTMENT"

"RESIDENTIALHOUSE"

"SCHOOL"

"WAREHOUSE"

```
{
  "Quote": {
    "QuoteRequest": {
      ...
      "Origin": {
        ...
      },
      "Destination": {
        ...
        "LocationId": null,
        "LegMiles": 0,
        "LocationType": "RESIDENTIALHOUSE",
        "Notes": null
      },
      "PaymentType": "TP",
      ...
    },
    ...
  }
}
```

```
}  
}
```

If you leave TransportMode and TruckType blank, the system will automatically choose the correct type based on the quote.

TransportMode: *(If you do not specify a value, pricing will come back on both options if available).*

AF: Air\Time Critical Forwarding

EX: Expedite Ground

TruckType: *(if you do not specify a value, one will be chosen based on the items being shipped)*

A: Cargo Van

B: 12' Straight Truck

C: 18' Straight Truck

D: 22' Straight Truck

E: 53' Tractor Trailer

PaymentType:

PP: Prepaid

CC: Collect

TP: Third Party

ServiceLevel:

This is obsolete and can be ignored. It no longer effects pricing.

PackageType:

BAG: Bags

BBL: Barrels

BDL: Bundles

BOX: Boxes

CNT: Containers

CRT: Crates

CTN: Catons

CYL: Cylinders

DRM: Drums

OTH: Other

PCS: Pieces

PKG: Packages

PLT: Pallets

ROL: Rolls

SKD: Skids

TRL: Trailer
