Item: 0115 Section References

Effective: 05-22-2017**Issued:** 05-12-2017

When reference is made from other tariffs or from this tariff to Sections in this tariff, such references shall be understood to mean:

References to:

Section 2 shall mean Item 2000, General Time-critical Pricing

Section 3 shall mean Item 3000, Specific Account Pricing Programs

Section 4 shall mean Item 4000, Time-critical Spot Quotes

Item: 0120 Dimensional Weight

Effective: 05-22-2017**Issued:** 05-12-2017

Transportation charges established under Specific Account Pricing items and Specific Account Pricing Programs in Item 3000, except to the extent otherwise provided herein, will be assessed on the gross weight of the shipment based on the greater of the actual or dimensional weight. Dimensional weight will be derived from the cubic measurement of the shipment on the basis of one pound for each 194 cubic inches. When the greater of the actual or dimensional weight is used to determine applicable freight charges, the shipment will not be subject to Item 611-1 of ABFS 111 Series (Density Minimum Charge).

In connection with all Time-critical Spot Quotes, as further outlined in Item 4000 herein, the dimensional weight will be derived from the cubic measurement of the shipment on the basis of one pound for each 194 cubic inches.

Example: Shipment weighs 150 pounds and is 36" long, 36" wide and 24" high. Multiply length times width times height and divide by 194 ($36 \times 36 \times 24 = 31,104 / 194 = 160$ pounds dimensional weight). Since dimensional weight is greater than actual, use dimensional weight.

Item: 0160 Application

Effective: 05-22-2017

Issued: 05-12-2017

1. The following terms and conditions are applicable to all shipments moving under ABF 610 tariff. Additional terms and conditions may be found under the item applicable to the service requested for the specific shipment. (See Item 486, Item 2000, Item 3000 and Item 4000.)
2. Unless otherwise specifically provided herein, Saturday and Sunday are not considered as days of transit.
3. Specific indication of a delivery request "On" a specific date, or "Between" a range of dates, must be clearly designated on the original bill of lading in order for ABF Freight to enact delivery "On" or "Between" the specified period.

Specific indication of a delivery request "Between," a time range, as further defined in Item 486 herein, or in Specific Account Pricing, must be clearly designated on the original bill of lading in order for ABF Freight to enact delivery "Between" the specified time range.

When no date/time service request is made on the original bill of lading, ABF Freight will provide delivery by the applicable date as defined under the provisions governing the time-critical service for the shipment, subject to delivery by 5 p.m. as outlined in Item 750 herein.

If a customer inadvertently endorses the original bill of lading at the time of shipment as "Assured Service PM," ABF Freight will automatically convert the service to time critical with delivery by the ABF Freight advertised transit due date.

If a customer inadvertently endorses the original bill of lading at the time of shipment as "Assured Service Noon," ABF Freight will automatically convert the service to time critical with delivery by Noon by the ABF Freight advertised transit due date subject to additional charges as outlined in Item 486 of ABF 610.

A request for Assured Service that does not indicate either "PM" or "Noon" delivery will be converted to time-critical with delivery by the ABF Freight advertised transit due date.

4. Executing Section 7 on the original bill of lading will negate this service.
5. ABF Freight reserves the right to reject a service request when the requested service cannot be reasonably performed or is not available for the specified origin/destination.
6. ABF Freight reserves the right to reject a request to provide time-critical service in connection with a shipment for which pickup service has already been completed. Any such request will be evaluated on a case by case basis. If the request is approved, the applicable pricing herein will be applied. Customer agreement will be documented in the confirmation notice and through this confirmation notice, Customer agrees to the terms of this tariff.
7. Except as otherwise provided herein, including but not limited to Item 780-1, the rates, charges, and rules and regulations of this tariff shall take precedence to any otherwise applicable rates, charges, quotes, or terms contained in any otherwise applicable and effective tariff, or contract, including the terms and conditions contained on the shipment documents. To the extent different time sensitive pricing could apply to a single shipment, the following order of precedence will apply:
 - a) Time-critical Quote ID (see Item 4000 for more information)

The fuel surcharge for air transportation services is subject to monthly adjustment based on a rounded average of the U.S. Gulf Coast (USGC) spot price for a gallon of kerosene-type jet fuel. The FSC is subject to change on the 15th of each month based on the previous months average. When fuel prices equal or exceed \$3.72 per gallon, the air fuel surcharge continues to increase \$0.005 with every four-cent increment.

In applying the surcharge, first determine the freight charges that would otherwise be applicable without the effect of the surcharge, including the effect of the alternation process and any applicable discount or reduction. Once determined, the charge will then be subject to increase by the amount of the surcharge. The surcharge will be shown as a separate line entry on the freight bill.

Freight charges for air line haul transportation shall include line haul, pickup and delivery charges such as, but not limited to, minimum charges, density minimum charges, dimensional weight charges, absolute minimum charges and over-dimension charges. Except as otherwise provided the increase will not apply to charges for special services. Where a through rate is constructed by combining two or more factors, the surcharge shall be applied to the resulting total charges.

For shipments moving on ABF626 tariff between points in the U.S. and points in Canada, a 10% surcharge will apply when no specific delivery date is requested on the original bill of lading or when the requested delivery date is equal to or slower than ABF Freight's advertised service.

6. Additionally, shipments subject to the terms and provisions under this item will be subject to an absolute minimum charge, before inclusion of charges associated with special services, of \$280.00 per shipment.
7. In order to execute time-critical service as provided under this item, consignor must endorse the original bill of lading at time of shipment by applying an ABF Freight provided "time critical" sticker, or clearly notating "time critical" on the original bill of lading.

If a customer inadvertently endorses the original bill of lading at the time of shipment as "Assured Service PM," ABF Freight will automatically convert the service to time critical with delivery by the ABF Freight advertised transit due date.

If a customer inadvertently endorses the original bill of lading at the time of shipment as "Assured Service Noon," ABF Freight will automatically convert the service to time critical with delivery by Noon by the ABF Freight advertised transit due date subject to additional charges as outlined in Item 486 of ABF 610.

A request for Assured Service that does not indicate either "PM" or "Noon" delivery will be converted to time critical with delivery by the ABF Freight advertised transit due date.

8. When time-critical service is requested as provided in 7) above and the date requested on the original bill of lading is faster than the service outlined in 5) above, the service will default to the slower of the date requested or ABF Freight's fastest in-network ground service. A time-critical quotation will be created and those charges will apply for the service ABF Freight provides. ABF Freight will make a reasonable effort to contact the shipper prior to actual delivery of the shipment to confirm requested service.
9. Unless otherwise provided in the Specific Account Pricing, services options requested through the methods outlined in Item 2000 herein will not be applicable when the shipper has installed or requested installation of a bulkhead for use in transportation of the shipment. In lieu thereof, a time-critical quotation will be created and those charges will apply for the service ABF Freight provides. ABF Freight will make a reasonable effort to contact the shipper prior to actual delivery of the shipment to confirm requested service.

10. Unless otherwise provided in the Specific Account Pricing, when the date and/or time requested on the original bill of lading is faster than the date/time service outlined in the Specific Account Pricing, the service will be defaulted to the slower of the date requested or ABF Freight's fastest in-network ground service. A time-critical quotation will be created and those charges will apply for the service ABF Freight provides. ABF Freight will make a reasonable effort to contact the shipper prior to actual delivery of the shipment to confirm requested service.

11. Unless otherwise provided in the Specific Account Pricing, the requested delivery times cannot include deliveries before 9 AM local time or past 5 PM local time, and requested delivery dates cannot be on weekends or on holidays. When such delivery dates and/or times are requested, service will be based on ABF Freight's fastest in-network ground service which can be found at arcb.com.

12. If multiple price/service options exist in the Specific Account Pricing, the applicable pricing will be determined as follows:
 - a. The price which matches the transit date/time service requested on the original bill of lading.
 - b. When the service requested on the original bill of lading matches multiple price/service options in the Specific Account Pricing, the cheaper rate will apply.
 - c. If no transit date/time service options match the service requested on the original bill of lading, and the date/time requested on the bill of lading is slower than the price/service options available within the Specific Account Pricing, the price/service option which most closely matches the requested service will be applied and ABF Freight will deliver per the transit date/time service requested on the original bill of lading.

13. Unless otherwise provided in the Specific Account Pricing, the pricing and requested service contained within the Specific Account Pricing program will not be applicable in connection with shipments where the shipper has installed or requested installation of a bulkhead for use in transportation of the shipment.
